SureColor SC-T5270/T7270

ENGINEERED FOR BUSINESS

Precision and Professional Output

The SureColor T-Series produces durable, quality prints. Print lines as thin as 0.02mm with a line accuracy of +/-0.1%, making it an ideal printer for CAD and 3D renderings.

Unparalleled Versatility

Print a wide range of applications with exceptional print quality, including architectural plans, maps, 3D rendering graphics, indoor signage and posters.

Exceptional Productivity Speed

Print documents at outstanding speeds of up to 2 A1 prints per minute.

Designed with the engineering profession in mind, the Epson SureColor T-Series ensures that you are empowered to print what you think with stunning quality and precision. Employing PrecisionCore technology, line placement is accurate to within +/- 0.1%, ensuring that your blueprints and graphics express what you really want them to.

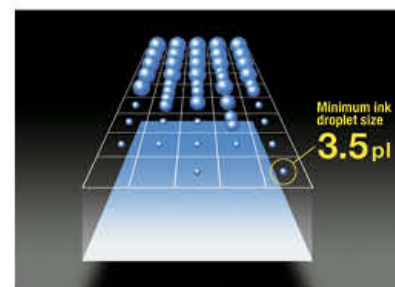

Precision and Professional Output

Superior Precision and Quality

Utilising Epson's next-generation PrecisionCore printhead and Variable Size Dot Technology (VSDT), CAD documents and 3D architecture designs will be more accurate and colour consistent than ever before, with the industry-topping 10 nozzle lines* per printhead. Print precise lines as thin as 0.02mm with as little error as +/-0.1%, ensuring that you deliver your concept exactly how you want to. The PrecisionCore TFP printhead also removes the need for printhead replacements, avoiding the need to stock up on replacements, effectively providing you with a cost-effective printing solution.

*360 dpi per line

The combination of both technologies allow the ink droplets to be controlled to the finesse of 3.5 picolitres.

Remarkable Archivability

In industries that are constantly exposed to various types of environments, prints have to be durable enough to withstand elemental challenges. Epson's all-pigment UltraChrome XD Ink has a higher ink penetration on paper, providing you with tested high lightfastness, rub and water-resistant prints, ensuring that your prints can go anywhere you need them to.

Experience extremely long-lasting prints with minimum aging effects*. The Epson UltraChrome XD ink also grants you an accurate reference of previous jobs, and cuts costs by exempting you from having to reprint documents for reference.

Print sample aging test on gloss paper	0 year	Light 52 years	Ozone Gas 50 years	Ozone Gas 60 years
EPSON UltraChrome XD Ink 				
Brand A (Dye Ink)				
Brand B (Dye Ink)				

*Light and ozone-fastness is evaluated using the JEITA CP-3901 Digital Colour Photo Print Stability Evaluation test methodology. Test conditions for light-fastness are set to simulate indoor condition illuminated by sunlight through a glass window. Test conditions for ozone-fastness are set to simulate graphical deterioration from ozone gas in a standard home environment. Test results are indicative and for evaluation purposes only. Actual light and ozone-fastness depends on prevailing storage and display conditions and are not guaranteed by the Seiko Epson Corporation.

Unparalleled Versatility

The Epson SureColor T-Series empowers you to produce a variety of prints with impeccable precision on a range of substrates, including 1.5mm thickboards. From architectural plans to maps and 3D renderings, print your required documents with confidence.

Indoor Signage

3D Rendering

CAD Drawing

GIS Map

Prints on 1.5mm media

With the add-on Epson T-Series MFP Scanner, you can expand the printer's application to include copying and scanning assorted media from newspapers to thickboard of up to 1.3mm.

Exceptional Productivity Speed

Print documents at outstanding speeds* of up to 2 A1 prints per minute for CAD documents, effectively assisting you in meeting deadlines and ensuring smooth business operations.

*Based on A1 plain paper printed via Speed mode.

POP

	Media	Resolution (dpi)	Print size	Print speed

Additional Roll media adapter	x	x	x	x	x	x	x

*All printers have only one slot available for either "320GB HDD" or "Adobe PostScript 3 Expansion Unit."

1. 320GB HDD

Enjoy greater productivity by adding the 320GB Internal Print Server to your printing line. Store up to 500 jobs on your SureColor T-Series for prompt printing without resending the data from a computer.

2. Adobe® PostScript® 3 Expansion Unit

Purchase Adobe PostScript 3 Expansion Unit to complement the Epson SureColor T-Series and be empowered to print directly with any Adobe software without the need for external drivers. Coupled with the 320GB Internal Print Server, the Adobe PostScript 3 Expansion Unit primes the T-series printer for maximum printing efficiency.

3. Automatic Take Up Reel**

Automate the collection of the finished printed product, allowing for continual printing of high volume print jobs.

** Available only for SC-T7270

4. Epson T-Series MFP Scanner

The 36" scanner provides you with a scanning feature for assorted media up to 1.3mm thick directly into your 320GB HDD. Be free to transfer the image to another SureColor T-Series printer, send it to a recipient via e-mail, or to store the image on your workspace shared folder or CIFS.

5. Additional Roll Media Adapter

The Additional Roll Media Adapter allows you to store an extra roll of substrate within the machine, giving you the option to mechanically switch between the two media samples to print on at will.

The Epson SureColor T-Series also uses a spindle-less roll holder that guarantees the operator's height will not hamper your work process, while making it easy to reload paper rapidly during peak periods.
